CSE 310 - Nakamura

Project 2 State

- My only issues lie in the insert and print commands for the BST. As of now, I am only able to insert 2 nodes after the root for some reason – I could not find the bug. So the insert command works for 2 nodes after the root. I was stuck on this issue for so long that I couldn't get to the print command for the BST. However, the rest of my project works as expected!
- I did not work with anyone and I only used stackoverflow.
